

1. Brand Identity & Voice

- **The Vibe:** Playful, bold, and incredibly organized. It feels like a high-end modern cookbook met a streetwear brand.
 - **Voice:** Encouraging and witty. Instead of "Start Cooking," the brand says things like **"Cook smarter, not harder."**
 - **Target:** Gen-Z and Millennial home cooks who find recipes on social media and want an app that looks as good as the content they consume.
-

2. Visual Language: The "Retro-Pop" System

Color Palette

The palette uses **"Muted Neons"** and soft pastels to create a layered, depth-filled look without being overwhelming.

- **Primary Accent (Lime Punch):** #D4E95A — Used for category highlights and primary action "pill" backgrounds.
- **Secondary Accent (Coral Heat):** #F79ACC — Used for "Popular" tags, heart icons, and illustrative elements.
- **Background Base (Soft Cream):** #F6FBDE — A warmer, more appetizing alternative to pure white for screen backgrounds.
- **Deep Charcoal:** #313131 — Used for all primary text, icons, and "dark" buttons to ensure high legibility against the pastels.
- **Subtle Pink:** A soft pink (as seen in the Ramen screen background) to differentiate recipe detail pages.

Typography

- **Primary Display Font: Space Grotesk (Bold/Medium).**
 - *Usage:* Headlines, recipe titles, and big numeric callouts (like Kcal).
 - *Character:* Technical yet quirky with distinct geometric shapes.
 - **Secondary Body Font:** A clean, neutral Sans-Serif (like Inter or Helvetica Neue).
 - *Usage:* Instructions, ingredient lists, and small metadata.
-

3. UI Component Specifications

The "Floating Card" System

Unlike standard cards, these use **extremely high-contrast shadows** or no shadows at all, relying on color blocking for separation.

- **Corner Radius: 32px** (Extra rounded for a friendly, modern feel).
- **Padding: 20px** internal padding for a "breathable" layout.

Buttons & Icons

- **Pill Shape:** All buttons (Next, Start, etc.) must be fully rounded (9999px).
 - **Illustration Style:** Flat, bold "sticker-style" illustrations for empty states and onboarding (e.g., the chef whisking).
 - **Iconography:** Thin-stroke line icons (likely **Feather** or **Lucide**) paired with solid charcoal backgrounds for the bottom nav bar.
-

4. Screen-Specific Layout Rules

The Library Page

- **Category Chips:** Circular icons at the top with "Breakfast," "Lunch," etc., using a Lime Punch #D4E95A active state.
- **Counter:** A bold Space Grotesk counter (e.g., "**172 lunches**") to give the user a sense of "Library Volume."
- **Recipe Cards:** Horizontal layout with a 1:1 square image on the left and metadata (Rating, Time, Difficulty) in small, pill-shaped badges on the right.

The Recipe Detail Page

- **Hero Image:** A circular "Plate View" image centered at the top.
 - **Macro Grid:** A 3-column minimalist table for Protein, Fat, and Carbs with thin charcoal borders.
 - **Step Indicators:** Solid charcoal circles with white numbers to create a clear "pathway" for the cook.
-

5. Behavioral Rules for Antigravity

- **"Sticker" Transitions:** When moving between pages, use "pop" animations rather than sliding fades to match the playful design.

- **Dynamic Backgrounds:** The background color of the app should subtly change based on the category (e.g., Green for Lunch, Pink for Dinner).
- **The "Cook Mode" Contrast:** Maintain the dark charcoal theme for Cook Mode to ensure ingredients and steps are visible under harsh kitchen lights.
